

## Reception Newsletter February 2015

Yesterday a Borough Oral Hygienist came to speak to the children about looking after their teeth. During the session the children learnt how to clean their teeth and had an opportunity to clean a puppets teeth using a large toothbrush. She asked me to let parents know that when cleaning teeth, children should spit out the toothpaste and NOT rinse with water. This is because the fluoride left in the mouth helps to stop decay.

Next week is Book Week.

We have asked your child to bring into school his/her favourite short story or fiction book which we will keep at school for the week. Please make sure it is labelled.

On Friday 13<sup>th</sup> February please dress your child as a character from a favourite story book.

With all the runny noses we have run out of tissues. If you are able to donate a box it would be appreciated.

Please remember to give your child a bottle filled with **water** everyday.

We are desperately short of socks, underwear and tights. Please return any that you may have and any donations are always welcome.

Thank you for all your support.  
Kind Regards  
The Reception Team.
